HI-LINE 6 FRAME DOOR— DADA R&D 2018

A simple, unitary, linear design which, in 2018, is embellished with the new Frame Door. Frame made of titan and pewter aluminium, with a selection of quality finishes for the fronts. The top of the door is shaped to ensure an ergonomic grip.

The composition is completed with the new system of shelves with built-in VVD hood and with the new Hi-Line6 snack bar, with its solid light oak and black oak top, featuring bevelled corners and profiles, on a titan and pewter aluminium frame.

Precious materials such as eucalyptus for the island base units, with pewter aluminium framed doors, and steel for the worktop with integrated sink and hob.

photo finishings
