WALL UNITS AND BACK PANELS LIGHTING—

In the wall units, LED lighting can be integrated into the front of the base frame and top element of the product, and it is housed in a satin finished extruded aluminium holder. Operating columns and Tivali back panels can be done (as an option) in white glass, ending in height with D|Frame wall unit or the hood shelf in aluminum. Integrated LED light can be switched on by a plug underneath the wall unit and the shelf.
